Vegetation Management Plan

Vegetation Clearing - Notes

INTRODUCTION

The *Environmental Management Division* of the **Saunders Havill Group** was engaged by **PEET Flagstone City** to prepare a *Vegetation Management Plan (VMP)* for the removal of vegetation for the first phase of operational works in stage 2-5 of Flagstone City project.

This VMP was drafted in response to the project's *Natural Environment Site Strategy's (NESS)* requirement for *VMPs*. The *VMP* will manage the vegetation clearing practices during operational work stages. The *VMP* will cover the first phase of clearing in the Stage 2-5 area of the project and correspond with the lodgement of the planning and civil applications for new roads, school site and space for surplus fill as a result of civil works. The clearing works will follow the general principal for vegetation clearing documented on this sheet.

To assist in the spatial depiction of the phase 1 clearing area and better allocate a tree retention and removal status, ecologists from the **Saunders Havill Group** completed a tree survey using Trimble Antenna based GPS units. The survey collected the following data on trees within and adjoining the phase 1 extent as provided by the project urban designer and engineer:

- Reference Point and Location
- Botanical Name / Common Name
- Trunk DBH
- AS4970-2009 – Tree Protection Zone

- Height and Spread
- Canopy and Trunk Condition Comments
- Fauna and Habitat Values and Details

Particular attention and detail was collected along Sandy Creek interface area to maximise the retention of healthy native habitat trees along the corridor.

CLEARING PHASES AND PROCESS

The following stages are required for clearing to be undertaken on this property and a copy of this *VMP* must be present with the clearing contractor on-site:

PHASE 1 – Demarcation

Tree Protection Fencing to be installed prior to the commencement of any clearing works on the site. Tree protection fencing is to be located at or beyond 12 x diameter at breast height (DBH) unless approved by an appointed Arborist around trees designated for retention or as per the locations shown in this drawing package (refer Fencing Note). Fencing shall clearly demark the extent of works ensuring no additional vegetation will be cleared.

PHASE 2 - Pre-start Meeting

Fencing shall be in place at the time of the official pre-start meeting for inspection by the Environmental Coordinator. A fauna spotter pre-works assessment report must be

carried out prior to the pre-start meeting and provided to the clearing contractor (Refer to *Fauna Management Plan* accompanying this application for details).

PHASE 4 - Undertake Clearing Works

Undertake removal of vegetation once approved for removal by the appointed fauna spotter. Clearing will occur in the direction outlined in *Fauna Management Plan* and managed by the appointed fauna spotter to allow all fauna unimpeded movement away from works areas. The contractor is to follow any tree felling directions of the appointed fauna spotter/arborist, including but not limited to, an excavator vertical tree grab attachment or cherry picker, where the use of bulldozer is not appropriate.

PHASE 5 - Post clearing Works

Cleared vegetation is to be reused on or off premises. Recycling techniques include mulching, tub-grinding, wood chipping and salvage (e.g. custom milling). Trees with identified hollows should have the hollow section preserved and this section should be suitably mounted on nearby or adjacent suitable trees.

Carry out assessment of all retained trees by a qualified arborist along the edge of development once civil works have been completed. Implement any tree management measures if advised by the arborist.

PLANS AND DOCUMENTS referred to in the PDA DEVELOPMENT APPROVAL

Approval no: DEV2018/951

PROJECT: Flagstone City - Stage 2-5 Phase 1 works

environmental management	
PLAN OF: Vegetation Management Plan	
DATE: 21/06/2018	CHECKED: AD
JOB REF: 7833	DRAWN: TC
DRAWING No.: 8047 E 17 Stage 2 VMP C	

**PLANS AND DOCUMENTS
referred to in the PDA
DEVELOPMENT APPROVAL**

Approval no: DEV2018/951

Date: 24/08/2018

**LWIA SEWER PUMP STATION
APPLICATION AREA**

**STAGE
SCHOOL 2A
SITE**

Legend

- Tree to retain (with TPZ)
- Tree to remove (with TPZ)
- Tree to remove - part of separate LWIA application (with TPZ)

- Tree to remove - Area required for surplus fill due to civil works
- Stage 2-5 phase 1 & school site works (including additional 10m vegetation clearing for construction access)

- School lot & road layout
- Civil road design
- Trunk sewer
- Temporary waterway crossing track
- Civil storm water design/culvert design
- Civil electrical/lighting design
- Batter top/toe
- Civil design contours

- Stockpile location (indicative)
- Separate application area for LWIA Sewer pump station
- LWIA pump station design details

- Tree protection fencing - to be fauna friendly design & subject to minor changes by Arborist and civil engineer
- Remnant Vegetation extent
- Existing contours (0.5m)

Vegetation Management Plan - Detail Sheet I8

DISCLAIMER

THESE PLANS HAVE BEEN PREPARED FOR THE EXCLUSIVE USE OF THE CLIENT. SAUNDERS HAVILL GROUP CANNOT ACCEPT RESPONSIBILITY FOR ANY USE OF OR RELIANCE ON THE CONTENTS OF THESE DRAWINGS BY ANY THIRD PARTY.

CONFIRM ALL DIMENSIONS ON SITE PRIOR TO CONSTRUCTION OR ANY OTHER WORK. NOT TO SCALE FROM THE DRAWINGS. A ALL DIMENSIONS ARE IN METERS. A 10% OVERLAP IS TO BE MAINTAINED BETWEEN ALL DIMENSIONS. A 10% OVERLAP IS TO BE MAINTAINED BETWEEN ALL DIMENSIONS.

PRIOR TO ANY DEMOLITION, EXCAVATION OR CONSTRUCTION, THE CLIENT SHOULD BE ADVISED BY THE RELEVANT AUTHORITY THAT THE CLIENT IS RESPONSIBLE FOR OBTAINING ALL NECESSARY PERMITS AND APPROVALS FOR ALL SERVICES.
