

A diagram of a building facade. The upper portion is a rectangle filled with a dense, repeating pattern of small, horizontal, wavy lines. The lower portion is a rectangle filled with vertical lines. Three square windows are positioned horizontally across the lower section, each defined by a thick black border.

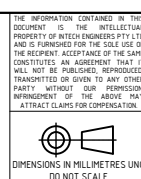

The site plan shows a rectangular building footprint with a total width of 11000 and a total depth of 5000. The building is divided into three main sections: an OFFICE on the left, a large COVERED AREA in the center, and a STORAGE area on the right. The OFFICE section contains four rectangular desks arranged vertically. The COVERED AREA is the largest section and features a curved wall on its left side. The STORAGE area is a narrow vertical strip on the right. A PARKING AREA is located below the building footprint. A north arrow is located in the top right corner of the plan.

Architectural elevation drawing of a building facade. The facade features a central semi-circular archway flanked by two rectangular sections. Each rectangular section contains a grid of windows. The overall height is 2590 units. The width of the central arch is 6000 units, and the width of each side section is 2440 units.

Technical drawing of a rectangular structure. The lower portion is filled with vertical hatching, and the upper portion is filled with a dotted pattern. The width of the structure is indicated as 6090.
