10 November 2022

EG Asiapac Ventures No. 1 Pty Ltd
C/- Evolve Planning
Att: Ms Kate Evans
11 Staghorn Close
PALMVIEW QLD 4553

Email: kate@evolveplanning.net.au

Dear Kate

S89(1)(a) Approval of PDA development application

PDA Development Permit for a Material Change of Use for Service Station (with Shop, Fast Food Premises and Food Premises) and Fast Food Premises, and Operational Work for Advertising Signage at Aura Boulevard and Farmer Crescent, Baringa described as Lot 345 on SP305382 (Future Lot 101)

On 10 November 2022, pursuant to s.85(4)(b) of the *Economic Development Act 2012*, the Minister for Economic Development Queensland (MEDQ) decided to grant **all** of the PDA development application applied for, in accordance with the attached PDA decision notice.

The PDA decision notice and approved plans / documents can also be viewed in the MEDQ Development Approvals Register via the Department website at www.dsdlgp.qld.gov.au/pda-da-applications.

If you require any further information, please contact Andrew McKnight, Principal Planner, Development Assessment, in Economic Development Queensland, by telephone on (07) 3452 7406 or at Andrew.McKnight@dsdlgp.qld.gov.au, who will be pleased to assist.

Yours sincerely

Jeanine Stone
**Director
Development Assessment
Economic Development Queensland**

PDA Decision Notice

Site information		
Name of priority development area (PDA)	Caloundra South PDA	
Site address	Vacant land at Aura Boulevard and Farmer Crescent, Baringa QLD 4551	
Lot on plan description	Lot number	Plan description
	Part of Lot 345 (Proposed lot 101)	SP305382
PDA development application details		
DEV reference number	DEV2022/1327	
'Properly made' date	23 August 2022	
Type of application	☒ PDA development application for: ☒ Material change of use ☐ Preliminary approval ☒ Development permit ☐ Reconfiguring a lot ☐ Preliminary approval ☐ Development permit ☒ Operational work ☐ Preliminary approval ☒ Development permit ☐ Application to change PDA development approval ☐ Application to extend currency period	
Proposed development	Service Station (with Shop, Fast Food Premises and Food Premises) Fast Food Premises Operational Work for Advertising Devices	
PDA development approval details		
Decision of the MEDQ	The MEDQ has decided to grant all of the PDA development approval applied for, subject to PDA development conditions forming part of this decision notice. The approval is for: • Development Permit for Service Station (with Shop, Fast Food Premises and Food Premises), • Development Permit for Fast Food Premises, and • Development Permit for Operational Work – Advertising Devices.	
Decision date	10 November 2022	
Currency period	6 years from the date of the decision	

Approved plans and documents

The plans and documents approved by the MEDQ and referred to in the PDA development conditions for the PDA development approval are detailed below.

Approved plans and documents		Number	Date
Service Station (with Shop, Fast Food Premises and Food Premises) & Fast Food Premises			
1.	Cover page – i2C	DA00	12/09/2022
2.	Context Plan – i2C	2021-081 DA01 Issue C	16/08/2022
3.	Site Plan – i2C	2021-081 DA02 Issue D	22/09/2022
4.	Vehicle Sweep Path Plan - i2C	2021-081 DA03 issue B	16/08/2022
5.	Overall Elevations – i2C	2021-081 DA04 issue D	22/09/2022
6.	Service Station Plan, Roof Plan – i2C	2021-081 DA05 issue D	22/09/2022

PDA development conditions

PREAMBLE AND ABBREVIATIONS

For the purpose of interpreting this approval, including the conditions, the following applies:

The following is a list of abbreviations utilised in this approval:

1. **AILA** means a Landscape Architect registered by the Australian Institute of Landscape Architects.
2. **Certification Procedures Manual** means the document titled *Certification Procedures Manual*, prepared by EDQ, dated April 2020 (as amended from time to time).
3. **Council** means the relevant local government for the land the subject of this approval.
4. **DSDILGP** means the Department of State Development, Infrastructure Local Government and Planning.
5. **EDQ** means Economic Development Queensland.
6. **EDQ DA** means Economic Development Queensland's – Development Assessment team.
7. **EDQ IS** means Economic Development Queensland's – Infrastructure Solutions team.
8. **MEDQ** means the Minister for Economic Development Queensland.
9. **PDA** means Priority Development Area.
10. **RPEQ** means Registered Professional Engineer of Queensland.
11. **WWIA** means the Caloundra South Infrastructure Agreement (Water and Wastewater Infrastructure Agreement) in effect 20 March 2017 (as amended from time to time).

COMPLIANCE ASSESSMENT:

Where a condition of this approval requires Compliance Assessment, Compliance Assessment is required in accordance with the following:

- a) The applicant must:
 - i) pay to MEDQ at the time of submission the relevant fee for Compliance Assessment, including any third party peer review costs which will be charged on a 100% cost recovery basis. The Compliance Assessment fees are set out in EDQ Development Assessment Fees and Charges Schedule¹ (as amended from time to time).
 - ii) submit to EDQ DA a duly completed Compliance Assessment form².
 - iii) submit to EDQ DA the documentation as required under the relevant condition.
- b) Where EDQ is satisfied the documentation submitted for Compliance Assessment meets the requirements of the relevant condition (or element of the condition), EDQ will endorse the documentation and advise by written notice.
- c) Compliance Assessment and endorsement can be repeated where a different design or solution, to that already endorsed, is sought.
- d) The process and timeframes that apply to Compliance Assessment are as follows:
 - i) applicant submits items required under a) above to EDQ DA for Compliance Assessment.
 - ii) **within 20 business days** – EDQ assesses the documentation and:
 - 1. if satisfied, endorses the documentation; or
 - 2. if not satisfied, notifies the applicant accordingly.
 - iii) if the applicant is notified under ii.2. above, revised documentation must be submitted **within 20 business days** from the date of notification.
 - iv) **within 20 business days** – EDQ assesses the revised documentation and:
 - 1. if satisfied, endorses the revised documentation; or
 - 2. if not satisfied, notifies the applicant accordingly.
 - v) where EDQ notifies the applicant as stated under iv.2. above, repeat steps iii. and iv. above. If either party is not satisfied by the outcome of this process, that party can elect to enter into a mediation process with an independent mediator agreed to by both parties.

Despite note v. above, the condition (or element of the condition) is determined to have been met only when EDQ endorses relevant documentation.

SUBMITTING DOCUMENTATION TO EDQ:

Where a condition of this approval requires documentation to be submitted to either EDQ DA or EDQ IS, submit the documentation to:

- a) EDQ DA at: pdadevelopmentassessment@dsdmip.qld.gov.au.
- b) EDQ IS at: EDQ_PrePostConstruction@dsdmip.qld.gov.au

¹ The EDQ Development Assessment Fees and Charges Schedule is available at EDQ's website.

² The Compliance Assessment form is available at EDQ's website. It sets out how to submit documentation for Compliance Assessment and how to pay Compliance Assessment fees.

No.	Condition	Timing
Material Change of Use		
1.	Carry Out and Maintain the Approved Development Carry out and maintain the approved development generally in accordance with: a) the approved plans and documents; and b) any other documentation endorsed via Compliance Assessment as required by these conditions.	Prior to commencement of use
2.	Hours of operation The premises, being Service Station (with Shop, Fast Food Premises and Food Premises) and Fast Food Premises, can operate 24 hours a day, 7 days a week	At all times
Construction Management		
3.	Hours of Work – Construction Unless otherwise endorsed, via Compliance Assessment for out of hours work, construction hours for the approved development are limited to Monday to Saturday between 6:30am to 6:30pm, excluding public holidays.	During construction unless otherwise endorsed
4.	Out of Hours Work – Compliance Assessment Where out of hours work is proposed, submit to EDQ DA, for Compliance Assessment, an out of hours work request. The out of hours work request must include a duly completed out of hours work request form ³ .	Minimum of 10 business days prior to proposed out of hours work commencement date
5.	Certification of Operational Work Carry out all Operational Work under this approval in accordance with the <i>Certification Procedures Manual</i> .	At all times
6.	Construction Management Plan a) Submit to EDQ IS a site-based Construction Management Plan (CMP) prepared by the principal site contractor and reviewed by a suitably qualified and experienced person responsible for overseeing the site works, to manage construction impacts, including: i) noise and dust in accordance with the EP Act; ii) stormwater flows around and through the site without increasing the concentration of total suspended solids or Prescribed Water Contaminants (as defined in the EP Act), causing erosion, creating any ponding and causing any actionable nuisance to upstream and downstream properties; iii) contaminated land, where required under a site suitability statement prepared in accordance with section 389 of the EP Act; iv) complaints procedures; v) site management:	a) Prior to commencing work

³ The out of hours work request form is available at EDQ's website.

	1. for the provision of safe and functional alternative pedestrian routes, past, through or around the site; 2. to mitigate impacts to public sector entity assets, including street trees, on or external to the site; 3. for safe and functional temporary vehicular access points and frequency of use; 4. for the safe and functional loading and unloading of materials including the location of any remote loading sites; 5. for the location of materials, structures, plant and equipment; 6. of waste generated by construction activities; 7. detailing how materials are to be loaded/unloaded; 8. of proposed external hoardings and gantries (with clearances to street furniture and other public sector entity assets); 9. of employee and visitor parking areas; 10. of anticipated staging and programming; 11. for the provision of safe and functional emergency exit routes; and 12. any out of hours work as endorsed via Compliance Assessment. b) A copy of the CMP submitted under part a) of this condition must be current and available on site. c) Carry out all construction work generally in accordance with the CMP submitted under part a) of this condition.	b) During construction c) During construction
7.	Erosion and sediment management a) Submit to EDQ IS an Erosion and Sediment Control Plan (ESCP), certified by a RPEQ or an accredited professional in erosion and sediment control, and prepared generally in accordance with the following: i) construction phase stormwater management design objectives of the State Planning Policy 2017 (Appendix 2 Table A); ii) Healthy Land and Water Technical Note: Complying with the SPP – Sediment Management on Construction Sites. b) Implement the certified ESCP submitted under part a) of this condition.	a) Prior to commencing work b) During construction
8.	Traffic management plan a) Submit to EDQ IS a Traffic Management Plan (TMP) certified by a person holding a current Traffic Management Design qualification. The TMP must include the following: i) provision for the safe and functional management of traffic around and through the site during and outside of construction work hours; ii) provision for the safe and functional management of pedestrian traffic, including alternative pedestrian routes past, through or around the site; iii) provision of parking for workers and materials delivery;	a) Prior to commencing work

	iv) risk identification, assessment and identification of mitigation measures; v) ongoing monitoring, management review and certified updates (as required); and vi) traffic control plans and/or traffic control diagrams, prepared in accordance with <i>Austrroads Guide to Temporary Traffic Management</i>, for any temporary part or full road closures. b) Carry out all construction work generally in accordance with the certified TMP submitted under part a) of this condition, which is to be current and available on site. <i>NOTE: Operational traffic changes, such as temporary and permanent lane modifications, relaxation of clearway zone hours or footpath closures may require authorisation from Council or DTMR as road manager. It is recommended that applicants engage directly with the applicable road manager.</i>	b) During construction
9.	Public Infrastructure (Damage, Repairs and Relocation) a) Repair any damage to existing public infrastructure caused by works carried out in association with the approved development. b) Where existing public infrastructure require repair or relocation, due to the approved development and/or works associated with the approved development, repair and/or relocate the public infrastructure at no cost to others and in accordance with statutory requirements and the External Authority's design standards; and <i>NOTE: It is recommended applicants record their own dated photographic evidence of the condition of relevant existing public infrastructure both before and after works carried out in association with the approved development.</i>	a) Prior to commencement of use b) Prior to commencement of use
10.	Earthworks a) Submit to EDQ IS detailed earthworks plans certified by a RPEQ, and designed generally in accordance with: i) <i>Australian Standard AS3798 – 2007 Guidelines on Earthworks for Commercial and Residential Developments;</i> ii) <i>Bulk Earthworks Layout Plan Stage23Aii – Detail Design - Drawing No: 30031846-23Aii-120 Rev 04 dated 9 August 2022 (and amended in red 14 September 2022) by SMEC</i> The certified earthworks plans are to: i) include a geotechnical soils assessment of the site; ii) accord with the Erosion and Sediment Control Plans, as required by condition 7 – Erosion and sediment management; iii) include the location and finished surface levels of any cut and/or fill; iv) detail areas where dispersive soils will be disturbed, treatment of dispersive soils and their rehabilitation; v) provide details of any areas where surplus soils are to be stockpiled; vi) detail protection measures to:	a) Prior to commencing earthworks

	1. ensure adjoining properties and roads are not impacted by ponding or nuisance stormwater resulting from earthworks associated with the approved development; 2. preserve all drainage structures from structural loading impacts resulting from earthworks associated with the approved development; and vii) where rock or ground anchors are required within adjoining road or land, include consents from relevant road manager(s) and/or landowner(s). b) Carry out earthworks generally in accordance with the certified plans submitted under part a) of this condition. c) Submit to EDQ IS RPEQ certification that: i) all earthworks have been carried out generally in accordance with the certified plans submitted under part a) of this condition; and ii) any unsuitable material encountered has been treated or replaced with suitable material.	b) Prior to commencement of use c) Prior to commencement of use
11.	Acid Sulfate Soils a) Where on-site ASS are encountered, submit to EDQ IS an ASS management plan, prepared in accordance with the <i>Queensland Acid Sulfate Soil Technical Manual Soil Management Guidelines v4.0 2014</i> (as amended from time to time). b) Excavate, remove and/or treat on site all disturbed ASS generally in accordance with the ASS management plan submitted under part a) of this condition. c) Submit to EDQ IS a validation report, certified by a suitably qualified environmental or soil scientist, confirming that all earthworks have been carried out in accordance with the ASS management plan submitted under part b) of this condition.	a) Prior to commencement of or during earthworks b) Prior to commencement of use c) Prior to commencement of use
12.	Retaining Walls a) Submit to EDQ IS detailed engineering plans, certified by a RPEQ, of all retaining walls 1m or greater in height. Retaining walls must be: i) certified to achieve a minimum 50 year design life; ii) designed generally in accordance with <i>Australian Standard AS4678 – Earth Retaining Structures</i> and relevant material standards (e.g. <i>AS3600 – Concrete Structures</i>); b) Construct retaining walls generally in accordance with the certified plans required under part a) of this condition. c) Submit to EDQ IS certification from an RPEQ that all retaining wall works 1.0m or greater in height have been constructed generally in accordance with the certified plans submitted under part a) of this condition.	a) Prior to commencing earthworks b) Prior to commencement of use c) Prior to commencement of use

	<i>systems,”</i> for an Equipment Level 1 Underground Petroleum Storage System; ii. AS1940-2004 “The storage and handling of flammable and combustible liquids” for an Underground Petroleum Storage System; iii. AS/NZS 1596:2008 – the storage and handling of LP gas; and iv. AS4977-200 – Petroleum products The design must ensure: 1. All inlets to bulk fuel storage tanks must be located to ensure that fuel delivery trucks can stand wholly within the site while discharging fuel. 2. Stage 1 Vapour Recovery Systems (VR1) must be installed for all tanks used for the storage of motor spirit/petrol on the site to return displaced vapour to the delivery vehicle during filling of the underground petroleum storage system. The Vapour Recovery System shall include the following: a. mixing of product must be prevented in pipework common to more than one tank; b. spring-loaded vapour return adaptor, which closes when the hose is disconnected, must be installed in the top of the riser; and c. the vapour recovery point must be located within 2 metres of the respective fill point 3. An approved leak detection system is included that: a. can detect a leak from any portion of the underground storage system; b. uses equipment that has been installed, calibrated and commissioned in accordance with the manufacturer's instructions; c. an automatic tank gauging (ATG) that includes an automatic system using an arrangement of sensor probes and other devices that monitor the underground petroleum storage system and provide inventory information and leak testing is included; and d. a tank pit observation well at the lowest point of each tank excavation pit is included; e. includes electronic line leak detection (ELLD) for pressure piping or safe suction for suction piping for the underground pipework. 4. All underground pipework is to be made of approved, non-corrodible materials. Approved materials include either: a. fibre-reinforced thermosetting resin composite (fibreglass) compatible with the product to be transferred; or b. flexible plastic meeting the requirements of UL971 Standard for non-metallic underground piping for flammable liquids. 5. All pressurised piping is to have secondary containment consisting of double-walled piping with an interstitial space. 6. Each tank fill point is to be: a. clearly labelled and identified in compliance with AS 4977-2008 Petroleum products - Pipeline, road	
--	---	--

	tanker compartment and underground tank identification; b. fitted with a camlock type or other liquid-tight connection; c. provided with spill containment of at least 15L capacity per spill point. 7. All fill and vapour recovery points are to be earthed in compliance with AS/NZS 1020- The control of undesirable static electricity and AS/NZS 3000- Electrical installations. (b) Construct underground petroleum storage system generally in accordance with the certified plans submitted under part a) of this condition (c) Submit to EDQ IS "as constructed" plans, certified by a RPEQ that the underground petroleum storage system has been constructed in accordance with the certified plans submitted under part a) of this condition.	b) Prior to commencement of use c) Prior to commencement of use
23.	Service Station – Fuel Dispensing Areas The fuel dispensing areas must be designed and constructed to ensure: a) All ground surfaces within the Fuel Dispensing Area (FDA) are to be constructed of impermeable materials free of gaps and/or cracks. Suitable materials include waterproofed, reinforced concrete or an approved equivalent. b) The FDA is to be clearly demarcated from the outer forecourt area, access roads, general parking bays and all other areas to clearly delineate the higher contamination risk area from lower risk areas. Acceptable demarcation methods include roll-over bunds, drainage lines or different coloured impermeable materials. c) Run off from the under-canopy fuel dispensing area and the tanker unloading area shall be directed to a Class 1 Oil Water Separator which can hold a minimum 8,000L. The Water Discharge from the Class 1 Oil Water Separator is to be connected to the stormwater system. At completion and prior to commencement of operating the site, a commissioning report on the Class 1 Oil Water Separator shall be provided to EDQ IS. d) A liquid-tight dispenser sump is to be installed under each dispensing unit to collect and contain any leak or runoff from the dispensing area from contaminating the surrounding soil/groundwater. e) Drainage inlets located in the vicinity of the general forecourt area must be provided with signage indicating the fate of flow such as "flows to treatment system" or "flows to Class 1 Oil Water Seaparator".	Prior to commencement of use and to be maintained

24.	Service Station – Environmental Performance a) The site management entity must at all times maintain plant and equipment in proper working order. b) Materials and equipment must be available on site to adequately contain and clean up spills of potentially polluting materials. An inventory of all clean up and containment materials and equipment, and documented emergency response and clean up procedures, must be kept on site. c) Contaminants or contaminated water must not be directly or indirectly released to surface water or groundwater at or outside the site except for: i. uncontaminated overland stormwater flow, or ii. uncontaminated stormwater to the stormwater system.	At all times following commencement of use
25.	Electricity a) Submit to EDQ IS a Certificate of Electricity Supply from Energex for the provision of electricity supply to the approved development. b) Connect the approved development in accordance with the Certificate of Electricity Supply submitted under part a) of this condition.	a) Prior to commencement of use b) Prior to commencement of use
26.	Telecommunications a) Submit to EDQ IS documentation from an authorised telecommunication service provider confirming that an agreement has been entered into for the provision of underground telecommunication services to the approved development. b) Connect the approved development in accordance with the documentation submitted under part a) of this condition.	a) Prior to commencement of use b) Prior to commencement of use
27.	Broadband a) Submit to EDQ IS written agreement, from an authorised telecommunications service provider, confirming that fibre-ready pit and pipe infrastructure designed to service the approved development can accommodate services compliant with <i>Industry Guideline G645:2017 Fibre-Ready Pit and Pipe Specification for Real Estate Development Projects</i>. b) Construct the fibre-ready pit and pipe infrastructure specified in the agreement submitted under part a) of this condition.	a) Prior to commencement of use b) Prior to commencement of use

28.	Landscape Works a) Submit to EDQ IS detailed landscape plan certified by an AILA generally in accordance with the following approved landscape concept plan set: i) <i>Aura EG Fuel Site prepared by AECOM dated 27 September 2022 (as amended in red 18 October 2022); and</i> ii) The detailed landscape plan should include total landscape planting area schedule with detailed planting design showing plant density / m²; species numbers; pot sizes; setbacks to pathways / infrastructures; and materials schedule for edging and hardscapes (if applicable). Any landscaping on the boundary with proposed Lot 102 is to integrate with the approved planting on Lot 101. b) Construct the landscape works generally in accordance with the certified plans submitted under part a) of this condition. c) Submit to EDQ IS “as constructed” plans, certified by an AILA that the landscape works have been undertaken generally in accordance with part (a) of this condition.	a) Prior to commencement of use b) Prior to commencement of use c) Prior to commencement of use
29.
