Dear EDQ Assessments

RE: CONTEXT AREA 3 SOUTH STAGES 9 AND 13 CHANGE APPLICATION ADDITIONAL ECOLOGICAL INFORMATION

Saunders Havill act on behalf of PEET Flagstone City Pty Ltd with respect to ecological matters associated with their Flagstone Context Area 3 (CA3) South project currently being assessed by Economic Development Queensland (EDQ). Please find herein additional information in support of the proposed change to the approved CA3 South Vegetation Management Plan that accompanies this memo.

It is understood that EDQ raised potential concerns around the proposed clearing of regrowth vegetation apparent on aerial analysis (refer Extract 1) and also changes to the clearing extent surrounding the Stage 13 park area.

Extract 1: Regrowth vegetation in CA3 South ex QGLobe

Bowen Hills 9 Thompson Street, Bowen Hills, Queensland 4006
Springfield Suite 1B, 6 Yoga Way, Springfield Central, Queensland 4300
1300 123 744 | **mail@saundershavill.com**

Regrowth Area

The subject area (Extract 1) is not constrained by any ecological overlays (refer Attachment 1).

Further, this area was approved for clearing and development under the previous version of the VMP (refer extracts at Attachment 2) and was not identified as an area of ecological significance in the detailed ecological assessments that underpinned the Context Area 3 Context Plan approval (refer Attachment 3 for SBAR extract).

Importantly, the area on ground constitutes relatively immature regrowth that has not been managed since 2020 when the entire area was largely devoid of noteworthy vegetation other than scattered trees that were recorded and are apparent on the VMP (refer Attachment 4).

Under the EDQ endorsed Natural Environment Site Strategy for Flagstone City, PEET are required to manage regrowth on site to reduce bushfire risk and can do so in Category X non-remnant areas without approval from EDQ (refer Extract 2).

Extract 2

Strategies for management of regrowth that is mapped as Category X	➢ Reduce bushfire risk by regular slashing and regrowth clearing of category X areas (only) and provide general grooming of the site by pneumatic tyred and tracked machinery. ➢ Where regrowth has a trunk diameter greater than 100mm measured at DBH and not Category X on the endorsed PMAV, a request for confirmation that the regrowth is not Significant Vegetation as defined in the PDA Development Scheme prior to commencing works must be sent to EDQ.	➢ All year, during the life of the project ➢ Prior to the commencement of clearing re-growth	➢ Not Applicable

In summary, the subject area is not constrained by any overlays, has previously been approved for clearing and contains relatively immature regrowth that could be cleared by PEET under the endorsed NESS without EDQ approval.

Stage 13 Park

Relatively minor changes have been made to the earthworks design surrounding the park area in Stage 13 that have resulted in changes to clearing extents (refer analysis at Attachment 5).

Notably, an additional tree will be cleared on the northern side of the park (Attachment 5 Area 1), however, a net gain in tree retention is achieved via the changes in earthworks along the southern park boundary (Attachment 5 Areas 2 and 3). These changes are considered marginal if measurable from an ecological perspective especially given the general lack of overlays in the subject area.

Thank-you for the opportunity to provide this review and assessment. If you require any additional information to proceed with your assessment, please do not hesitate to contact me directly.

Yours Sincerely
Saunders Havill Group

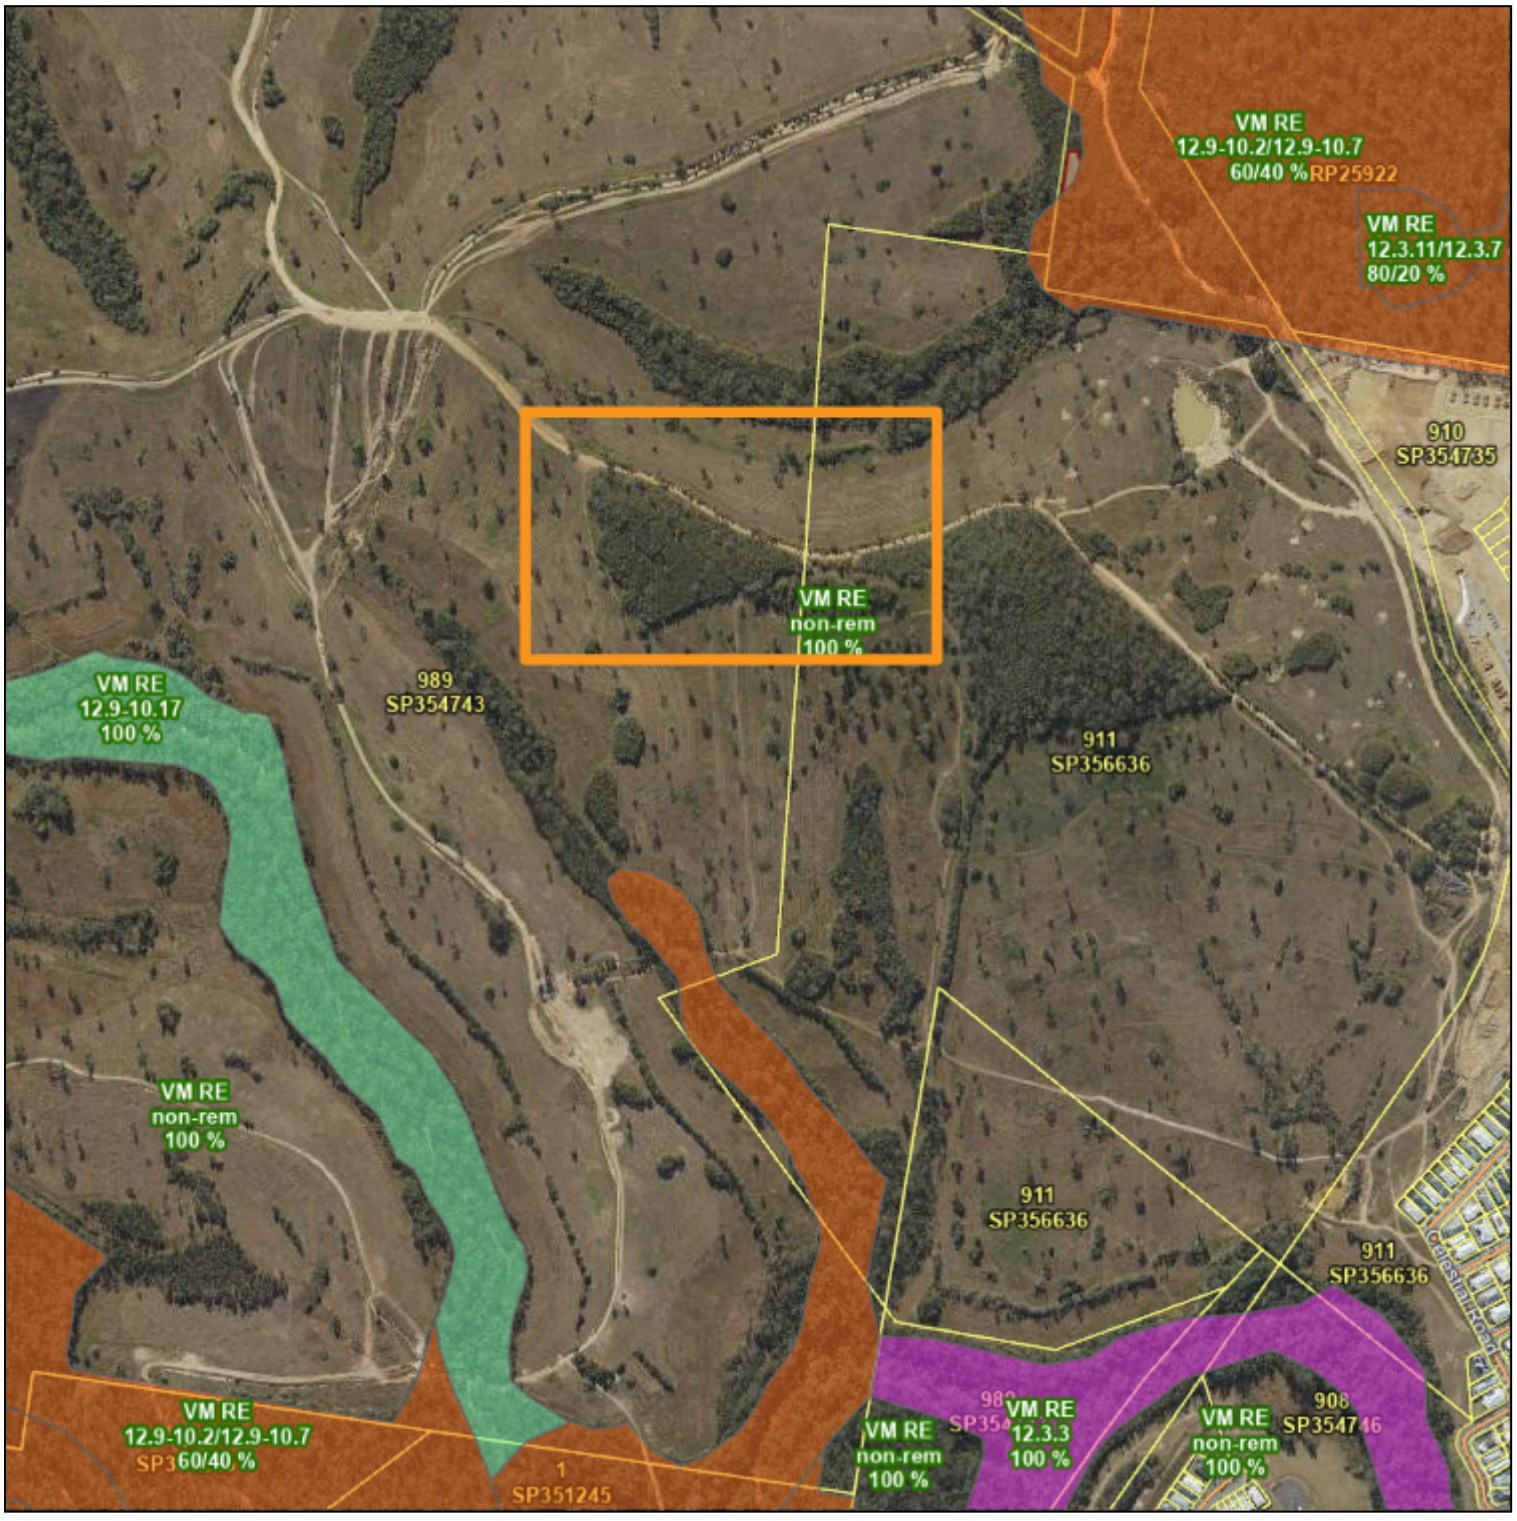

Dr. Andrew Davies
Manager Environmental Division / Associate Partner

9.1 Development Assessment

NOTES

This plan was prepared as a desktop assessment tool. The information on this plan is not suitable for any other purpose. Property dimensions, areas, numbers of lots and contours and other physical features shown have been compiled from existing information and may not have been verified by field survey. These may need verification if the development application is approved and development proceeds, and may change when a full survey is undertaken or in order to comply with development approval conditions. No reliance should be placed on the information on this plan for detailed design or for any financial dealings involving the land. Saunders Havill Group therefore disclaims any liability for any loss or damage whatsoever or howsoever incurred, arising from any party using or relying upon this plan for any purpose other than as a document prepared for the sole purpose of accompanying a development application and which may be subject to alteration beyond the control of the Saunders Havill Group. Unless a development approval states otherwise, this is not an approved plan.

PATHWAYS TO SUCCESS

FLAGSTONE CITY - CONTEXT AREA 3 (SOUTH)

Vegetation Management Plan - *Notes*

INTRODUCTION

The *Environmental Management Division* of **Saunders Havill** was engaged by **PEET Flagstone City** to prepare a *Vegetation Management Plan* (*VMP*) for the removal of vegetation in Context Area 3, Flagstone City.

This VMP was drafted in support of an operational works vegetation clearing application covering the southern area of the approved context plan area for CA3. The *VMP* will manage the vegetation clearing practices during operational work stages. The clearing works will follow the general principal for vegetation clearing documented on this sheet and be read in conjunction with the *Fauna Management Plan* document.

To assist in the spatial depiction of the clearing area and better allocate a tree retention and removal status, ecologists from **Saunders Havill** completed a tree survey using Trimble GNSS based GPS units. The survey collected the following features of trees within and adjoining the development extent as provided by the project Urban Designers (**RPS**):

- Reference number and point location
- Botanical Name / Common Name
- Trunk DBH
- AS4970-2025 – Tree Protection Zone
- Height and Spread
- Canopy and Trunk Condition
- Fauna and Habitat Values Details

CLEARING PHASES AND PROCESS

The following phases are required for clearing to be undertaken on this property and a copy of this *VMP* must be present with the clearing contractor on-site:

PHASE 1 – Demarcation

Tree Protection Fencing/flagging to be installed prior to the commencement of any clearing works on the site. Tree protection fencing is to be located at or beyond 12 x diameter at breast height (DBH) unless approved by an appointed Arborist around trees designated for retention or as per the locations shown in this drawing package (refer Fencing Note). Fencing shall clearly demark the extent of works ensuring no additional vegetation will be cleared.

PHASE 2 - Pre-start Meeting

Fencing shall be in place at the time of the official pre-start meeting for inspection by the Environmental Coordinator. A fauna spotter pre-works assessment report must be carried out prior to the pre-start meeting and provided to the clearing contractor (Refer to *Fauna Management Plan* accompanying this application for details).

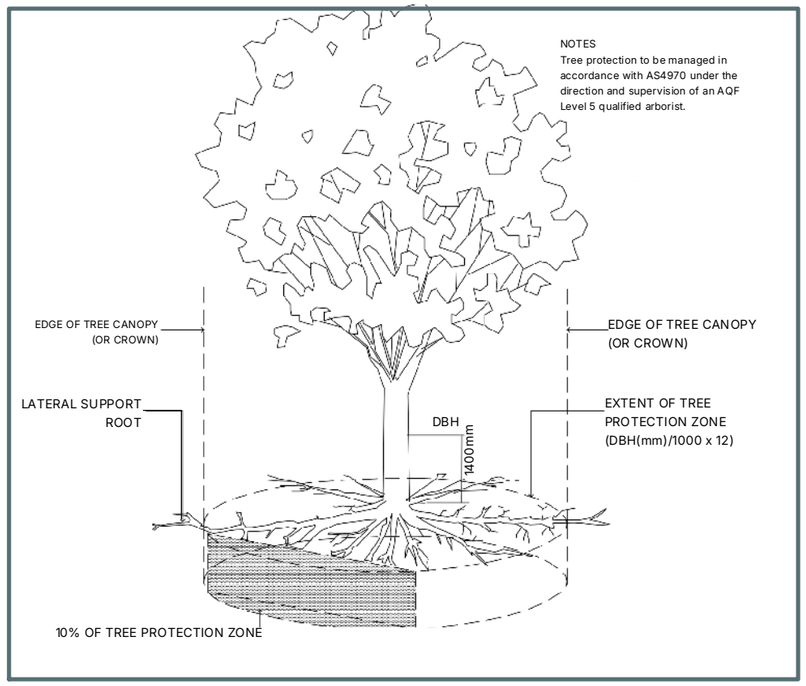

PHASE 3 - Undertake Clearing Works

Undertake removal of vegetation once approved for removal by the appointed fauna spotter. Clearing will occur in the direction outlined in *Fauna Management Plan* and will be managed by the appointed fauna spotter to allow all fauna to move unimpeded away from works areas. The contractor is to follow any tree felling directions of the appointed fauna spotter/arborist, including but not limited to, an excavator vertical tree grab attachment or cherry picker, where the use of bulldozer is not appropriate.

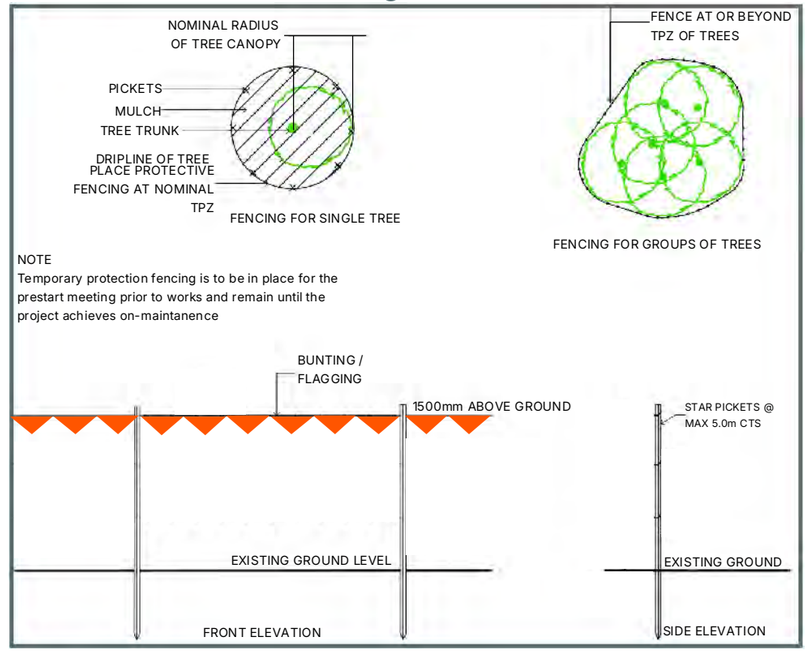

PHASE 4 - Post clearing Works

Cleared vegetation is to be reused on or off premises. Recycling techniques include mulching, tub-grinding, wood chipping and salvage (e.g. custom milling). Trees with identified hollows should have the hollow section preserved and this section should be suitably mounted on nearby or adjacent suitable trees. Carry out assessment of all retained trees by a qualified arborist along the edge of development once civil works have been completed. Implement any tree management measures if advised by the arborist.

Tree Protection Zone - Detail (not to scale)

Tree Protection Fencing - Detail (not to scale)

VEGETATION MANAGEMENT PLAN

DRAWING NO.

9850 E 07 CA3_S VMP E

FLAGSTONE CITY - CONTEXT AREA 3 (SOUTH)

Vegetation Management Plan - *Detail Sheet 08*

LEGEND

- Project Site
- Context Area 3 south area boundary
- Context Area 3 south area vegetation clearing
- Flagstone Core Corridors
- Tree to retain
- Tree to remove in bulk earthworks extent
- Tree retention subject to arborist and civil engineer's assessment
- Tree retention subject to future detail design of services/basins/ parks development areas
- Tree approved to remove in CP1 Stages 2-5 VMP
- Proposed Lots
- Proposed Roads and Footpaths
- Proposed Sports Field
- Batters
- Design contours
- Retaining Walls
- Drainage Design (SW)
- Sewer Design (S)
- Water Design (W)
- Existing contours
- Fauna friendly protection fencing
