- Vegetation Rehabilitation Zones
- Vegetated Drainage Corridor

Disclaimer

The contents of this plan are conceptual only, for discussion purposes. All areas and dimensions are approximate only subject to relevant studies, Survey, Engineering and Council approval.

Native vegetated drainage corridors are proposed to retain neighbouring local fauna and flora

The central and urban parks will contain a variety of play elements for all ages, open viewlines and passive surveillance will be a priority

Parks will be connected via a network of paths facilitating informal exercise and a healthy community

Open space and parks will have sufficient surveillance via town house and high density allotments fronting them
